Subject index

Ablation
Delayed extraction experiments using a repulsive potential before ion extraction: Evidence of clusters as ion precursors in UV-MALDI Part I: Dynamical effects with the matrix 2,5-dihydroxybenzoic acid, 203
Aldehydes
A selected ion flow tube study of the reactions of H_3O^+, NO+, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163
Alkylbenzene ions
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
APIMS
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191
Atmospheric speciated measurements
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91

Carbon scrambling
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Carbon surfaces
Energy partitioning in collisions of slow polyatomic ions with carbon surfaces, 145
Charge-directed cleavage
Triply charged bradykinin and gramicidin radical cations: their formation and the selective enhancement of charge-directed cleavage processes, 225
Charge transfer
A selected ion flow tube study of the reactions of H_3O+, NO+, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163
Chemical flow reactor
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91
Chemical ionisation mass spectrometry
A selected ion flow tube study of the reactions of H_3O+, NO+, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163
Chemical ionization mass spectrometry (CIMS)
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91
Clusters
Calculation to determine the mass of daughter ions in metastable decay, 81
Collision cross sections
Drift time mass spectrometric protein hydration experiments, 9
Confinement
Effect of magnetic field on the confinement of ions in a three dimensional radio frequency quadrupole trap, 177
Cross sections
Calculated electron impact cross sections for the K-shell ionization of Fe, Co, Mn, Ti, Zn, Nb, and Mo atoms using the DM formalism, 5

Daughter
Calculation to determine the mass of daughter ions in metastable decay, 81
Dianions
Photoinduced dissociation of anionic and electron detachment of dianionic gold clusters by use of a laser pointer, 157
Dimers
Hydrogen/deuterium exchange of monomers and dimers of leucine enkephalin, 1

Electron affinity
Electron affinity of some trimetallic nitride and conventional metallofullerenes, 183
Electron ionization
Calculated electron impact cross sections for the K-shell ionization of Fe, Co, Mn, Ti, Zn, Nb, and Mo atoms using the DM formalism, 5
Electron stripping
Triply charged bradykinin and gramicidin radical cations: their formation and the selective enhancement of charge-directed cleavage processes, 225

1387-3806/02/$22.00 © 2002 Elsevier Science B.V. All rights reserved
PII S1387-3806(02)00552-3

Electrospray ionization
Drift time mass spectrometric protein hydration experiments, 9
Hydrogen/deuterium exchange of monomers and dimers of leucine enkephalin, 1
Electrospray Ionization (ESI)
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191
Endohedral fullerenes
Electron affinity of some trimetallic nitride and conventional metallofullerenes, 183
Energy partitioning
Energy partitioning in collisions of slow polyatomic ions with carbon surfaces, 145

Fast flow
Hydrogen/deuterium exchange of monomers and dimers of leucine enkephalin, 1
Fourier transform ion cyclotron resonance mass spectrometer (FT ICR MS)
The gas-phase sodium basicities of common matrix-assisted laser desorption/ionization matrices, 237
Fragment kinetic energy
Surface induced dissociation of chromium hexacarbonyl on fluorinated alkanethiolate surface in ion cyclotron resonance mass spectrometer: studies of energetics of the process using recursive internal energy distribution search method, 25

Gas-phase sodium basicities (GNaB)
The gas-phase sodium basicities of common matrix-assisted laser desorption/ionization matrices, 237
GLY-HIS-LYS
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191

H/D exchange
Hydrogen/deuterium exchange of monomers and dimers of leucine enkephalin, 1
High-energy collisions
Triply charged bradykinin and gramicidin radical cations: their formation and the selective enhancement of charge-directed cleavage processes, 225
HO_2 radical
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91
Hydride ion transfer
A selected ion flow tube study of the reactions of H_3O+, $NO+$, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163
Hydrogen exchange, intramolecular
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Hydrogen scrambling
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101

ICPMS
Isotopes and concentrations of Zn in human blood and serum by ICP-MS, 217
Impulsional potential
Effect of magnetic field on the confinement of ions in a three dimensional radio frequency quadrupole trap, 177
IMS resolution
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191
Interfering ions
Isotopes and concentrations of Zn in human blood and serum by ICP-MS, 217
Internal energy deposition
Surface induced dissociation of chromium hexacarbonyl on fluorinated alkanethiolate surface in ion cyclotron resonance mass spectrometer: studies of energetics of the process using recursive internal energy distribution search method, 25
Intramolecular
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Ion cyclotron resonance
Surface induced dissociation of chromium hexacarbonyl on fluorinated alkanethiolate surface in ion cyclotron resonance mass spectrometer: studies of energetics of the process using recursive internal energy distribution search method, 25
Ion emission mechanisms
High temperature chemistry of molten glass ion emitters, 63
Ion formation
Delayed extraction experiments using a repulsive potential before ion extraction: Evidence of clusters as ion precursors in UV-MALDI Part I: Dynamical effects with the matrix 2,5-dihydroxybenzoic acid, 203
Ion mobility
Drift time mass spectrometric protein hydration experiments, 9
Ion mobility spectrometry (IMS)
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191
Ion-molecular equilibria
Electron affinity of some trimetallic nitride and conventional metallofullerenes, 183

Ions
Effect of magnetic field on the confinement of ions in a three dimensional radio frequency quadrupole trap, 177
Ion-surface collisions
Energy partitioning in collisions of slow polyatomic ions with carbon surfaces, 145
Isotope ratios
High temperature chemistry of molten glass ion emitters, 63

Kinetic energy measurements
Simulation of ion beam and optimization of orthogonal tandem ion trap/reflector time-of-flight mass spectrometry, 45
Knudsen cell mass spectrometry
Electron affinity of some trimetallic nitride and conventional metallofullerenes, 183
K-shell ionization
Calculated electron impact cross sections for the K-shell ionization of Fe, Co, Mn, Ti, Zn, Nb, and Mo atoms using the DM formalism, 5

Leucine enkephalin
Hydrogen/deuterium exchange of monomers and dimers of leucine enkephalin, 1

Magnetic field
Effect of magnetic field on the confinement of ions in a three dimensional radio frequency quadrupole trap, 177
MALDI
Delayed extraction experiments using a repulsive potential before ion extraction: Evidence of clusters as ion precursors in UV-MALDI Part I: Dynamical effects with the matrix 2,5-dihydroxybenzoic acid, 203
Mass
Calculation to determine the mass of daughter ions in metastable decay, 81
Matrix-assisted laser desorption/ionization (MALDI)
The gas-phase sodium basicities of common matrix-assisted laser desorption/ionization matrices, 237
Mechanisms
Delayed extraction experiments using a repulsive potential before ion extraction: Evidence of clusters as ion precursors in UV-MALDI Part I: Dynamical effects with the matrix 2,5-dihydroxybenzoic acid, 203
Metal atoms
Calculated electron impact cross sections for the K-shell ionization of Fe, Co, Mn, Ti, Zn, Nb, and Mo atoms using the DM formalism, 5
Metal clusters
Photoinduced dissociation of anionic and electron detachment of dianionic gold clusters by use of a laser pointer, 157
Metastable decay
Calculation to determine the mass of daughter ions in metastable decay, 81
Micro-electrospray
Evaluation of micro-electrospray ionization with ion mobility spectrometry/mass spectrometry, 191
Molten glass
High temperature chemistry of molten glass ion emitters, 63

Orthogonal coupling
Simulation of ion beam and optimization of orthogonal tandem ion trap/reflector time-of-flight mass spectrometry, 45

Penning trap
Photoinduced dissociation of anionic and electron detachment of dianionic gold clusters by use of a laser pointer, 157
Peptide radical cations
Triply charged bradykinin and gramicidin radical cations: their formation and the selective enhancement of charge-directed cleavage processes, 225
Phosphor-organic ions
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Photodetachment
Photoinduced dissociation of anionic and electron detachment of dianionic gold clusters by use of a laser pointer, 157
Photodissociation
Photoinduced dissociation of anionic and electron detachment of dianionic gold clusters by use of a laser pointer, 157
Polyatomic ions
Energy partitioning in collisions of slow polyatomic ions with carbon surfaces, 145
Protein hydration
Drift time mass spectrometric protein hydration experiments, 9
Proton exchange
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Proton transfer
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101

A selected ion flow tube study of the reactions of H_3O+, NO+, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163

Quadrupole ion trap
Simulation of ion beam and optimization of orthogonal tandem ion trap/reflector time-of-flight mass spectrometry, 45
Quadrupole rf trap
Effect of magnetic field on the confinement of ions in a three dimensional radio frequency quadrupole trap, 177

Reflectron
Calculation to determine the mass of daughter ions in metastable decay, 81
RO_2 radical
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91
ROXMAS
Atmospheric peroxy radicals: ROXMAS, a new mass spectrometric methodology for speciated measurements of HO_2 and ΣRO_2 and first results, 91

Self-assembled monolayers
Surface induced dissociation of chromium hexacarbonyl on fluorinated alkanethiolate surface in ion cyclotron resonance mass spectrometer: studies of energetics of the process using recursive internal energy distribution search method, 25
Sequencing
Triply charged bradykinin and gramicidin radical cations: their formation and the selective enhancement of charge-directed cleavage processes, 225
SIFT
A selected ion flow tube study of the reactions of H_3O+, NO+, and O_2+ with saturated and unsaturated aldehydes and subsequent hydration of the product ions, 163
Silica gel
High temperature chemistry of molten glass ion emitters, 63
Skeletal rearrangements
Half a century of scrambling in organic ions: complete, incomplete, progressive and composite atom interchange, 101
Surface induced dissociation
Surface induced dissociation of chromium hexacarbonyl on fluorinated alkanethiolate surface in ion cyclotron resonance mass spectrometer: studies of energetics of the process using recursive internal energy distribution search method, 25

Thermal ionization
High temperature chemistry of molten glass ion emitters, 63
Time-of-flight
Simulation of ion beam and optimization of orthogonal tandem ion trap/reflector time-of-flight mass spectrometry, 45
Time-of-flight mass-spectrometer
Calculation to determine the mass of daughter ions in metastable decay, 81
Time-of-flight mass spectrometry
Delayed extraction experiments using a repulsive potential before ion extraction: Evidence of clusters as ion precursors in UV-MALDI Part I: Dynamical effects with the matrix 2,5-dihydroxybenzoic acid, 203

Zn isotopes
Isotopes and concentrations of Zn in human blood and serum by ICP-MS, 217
